Attacks

Mission Assignment: MP1-4

Type: Group - Blackboard Discussion Board Forum: **MP1-2: Attack Events**
Resource: Internet, personal experience, assigned reading.

Description:
There are 5 basic steps that most attackers take to penetrate a computer and these are:

1. Probe for information
2. Penetrate any defenses
3. Modify security settings
4. Circulate to other systems
5. Paralyze networks and devices

This group assignment will require that you define one of the steps as listed above,   some suggested discussion points will be detailed in the discussion board.

Click on the image or link below to get more detailed information on each of these topics.
