

# Panopto

## View Video Statistics

One of the major benefits of Panopto is the ability to track statistics on videos posted in the system. Instructors can view statistics on which students watched the videos, how much of the video was watched, and number of times the video was watched.

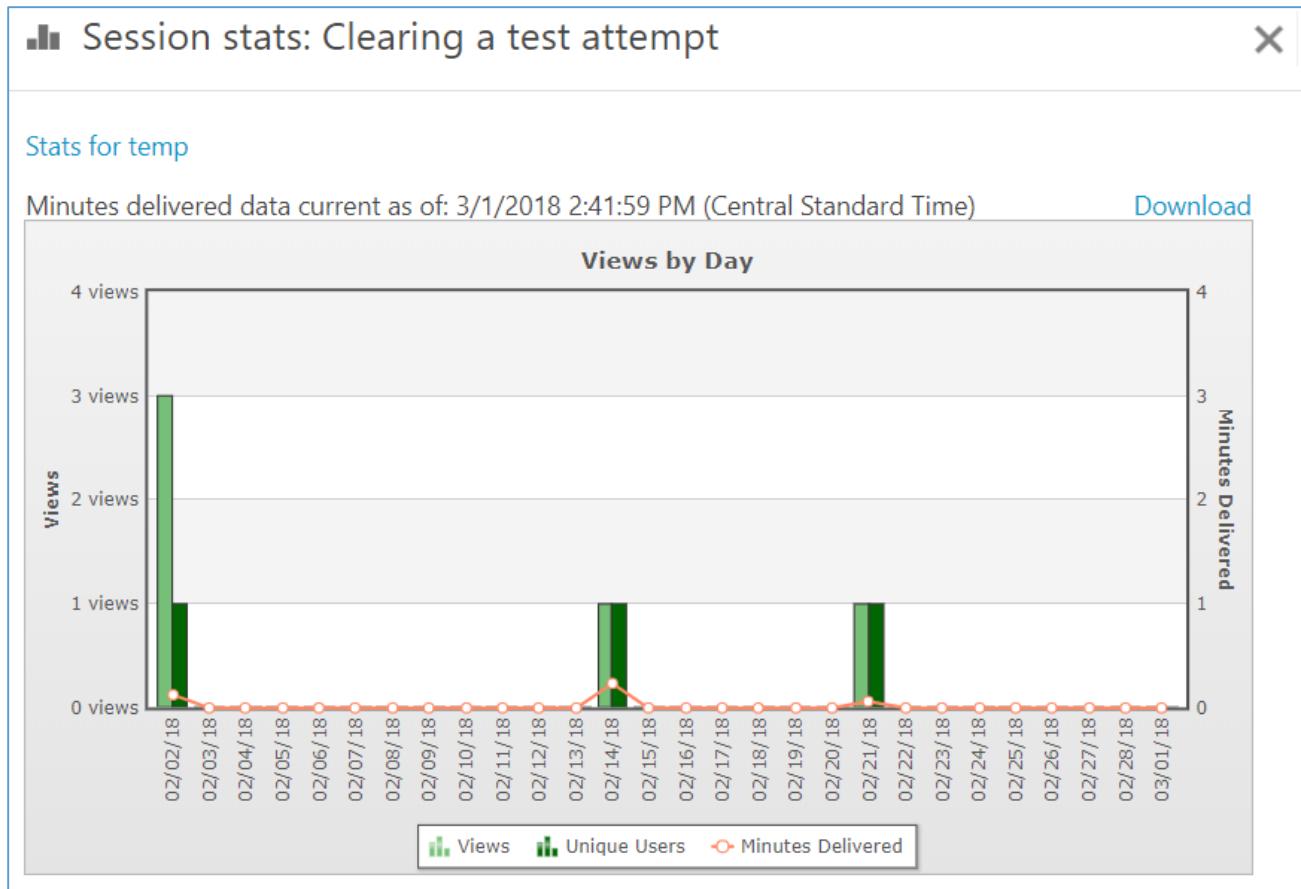

1. To view statistics on a video, log into Panopto and locate your video
2. Click on the “Stats” button below the video name

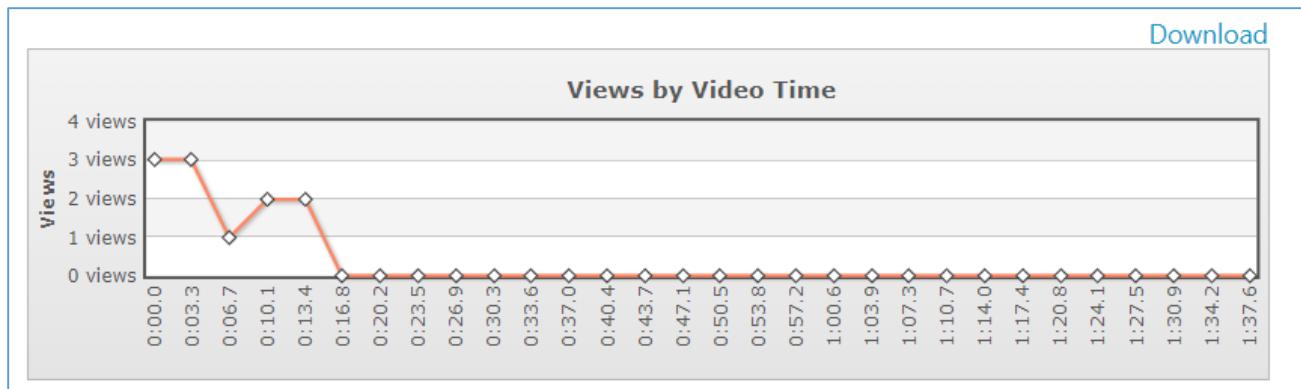

The screenshot shows the Panopto interface for viewing video statistics. At the top, there is a header with a camera icon and the word "temp". Below the header are various buttons for file operations (Upload, Refresh, Delete, etc.) and a "Filter by date" option. A "Show scheduled recordings" checkbox is also present. Below these controls is a sorting dropdown menu set to "Sort by: Date". A "Add folder" button is located in a sidebar on the left. The main area displays a video thumbnail for a recording titled "Clearing a test attempt" which was posted "a year ago in temp". The thumbnail shows a screenshot of a web browser with a message about clearing a test attempt. To the right of the thumbnail are several action buttons: "Settings", "Share", "Edit", "Stats" (which is highlighted with a red arrow), and "Delete".

3. Here you can see how many views there were on an individual day

4. You can also see if students are watching the video all the way to the end by looking at the “Views by Video Time” graph

5. You can also change the exact date range for which the statistics are shown

Past Day | Past Week | **Past Month** | Past Year | All Time | Custom Range

From  To

6. You can also view statistics on an entire folder by clicking on the stats button in the upper right hand corner

A screenshot of a video player interface. At the top, there is a toolbar with icons for upload, refresh, and filter by date, along with a checkbox for "Show scheduled recordings". Below the toolbar, there is a "Sort by:" dropdown menu set to "Name". A red arrow points to the fourth icon from the left in the toolbar, which is a bar chart representing statistics. The main area shows a folder named "temp" with a sub-item "Clearing a test attempt" and a timestamp of "a year ago in temp". A video thumbnail for "Clearing a test attempt" is displayed, showing a screenshot of a web browser with a video player interface. The video duration is listed as "1:41".

**NOTE:** To view statistics on Class Recording (Live Lecture) videos, you will want to log into Canvas and then click on the "Class Recordings" button in the course menu to view statistics on those videos.
